

Mathematic Course Registration
F.A.Q.

For which course should I register?

Initially you should register for the next course in the sequence, based on the course you are currently taking. Please write your math course in pen and ask your teacher to sign next to it.

Course sequence for the standard curriculum

Algebra 1 → Geometry → Algebra 2 → Precalculus

Students in Algebra 2 who do not want to take Precalculus can register for Probability and Statistics as an alternative. Students in Precalculus as juniors can register for AP Calculus AB, Calculus, or AP Statistics.

Course sequence for honors curriculum

Geometry H → Algebra 2H → Precalculus H → AP Calculus AB, or AP Statistics, or Calculus
If you are in AP Calculus as a sophomore or junior, you can register for AP Calculus BC, or AP Statistics.

Honors

You can request placement into honors but your teacher may ask that you wait until closer to the end of the semester. At the end of the year, we will inform counselors who has been recommended for honors. Students should be aware that selecting honors should be taken seriously. Honors-level math courses move more quickly and cover more material than non-honors courses.
